- Inspections and troubleshooting
- Repairs
- Installations
- Maintenance service
- Commissioning and training

# Quick troubleshooting due to competence and experience as well as a comprehensive stock of spare parts

Maintenance and break downs can be common place for recycling equipment especially with the mix of materials and stress of heavy duty applications. To ensure your companies success, to limit down time and to keep your equipment operational, your supplier must have a competent staff, superior service and large spare parts inventory.

With our extensive equipment knowledge, experienced staff and comprehensive spare parts inventory Herbold Meckesheim is able to react quickly to all of your service requirements. Our services include spare and wear parts inventory, field service, factory refurbishing, installation and training/commissioning. Let our staff assess your needs and quickly resolve your equipment issues or problems.

*High rack storage of spare parts*

## Spare parts

- With the help of our computer system our comprehensive stock of spare and wear parts is continuously checked and updated in regard to availability and inventory turnover. This enables us to execute purchase orders in most cases on the same day and to despatch the ordered parts to our customers all over the world with the desired delivery service. Our ability to deliver spare and wear parts is not restricted to our own machinery, we are also able to provide such parts for machines from other manufacturers in order to guarantee a smooth operation. By arrangement, we are also prepared to stock the most important, even special spare and wear parts in our warehouse.

Herbold also offers a blanket purchase order program allowing for quantity discounts on spare parts. Ask your spare parts representative how this program can benefit you.

*Spare parts*

# Repairs, maintenance services, optimisation of existing plants – comprehensive services from one source

*Before*

*Afterwards*

## Repairs

We can repair:

- our own machinery as well as machines from other manufacturers
- shredders, granulators, guillotines
- hammer mills, fine grinding systems
- washing line components, plastcompactors
- and ancillary equipment, such as mechanical or pneumatic conveying systems or other systems and components used for size reducing and recycling

*Tilting device*

## Optimise your existing plants

- It is also possible to retrofit and to optimise your machines and plants. It will be a pleasure for our experienced staff to consult you.

Examples for possible accessory equipment:

- Belt conveyors with and without metal detectors
- pneumatic conveyors, blowers, cyclones, pipework
- filter systems for dedusting the air of the work space
- dust separators for eliminating fines and fluffs from the grinding material
- screening machines, sifters for classifying according to size, specific weight or particle shape
- dryers for grinding material, film, straps and fibres
- debalers for coarsely or finely breaking up compressed bales for a visual control or a dosed feeding

*Silo*

- silos and mixing silos for agglomerates, grinding material, fibre, foam or film flakes
- filling stations for superbags, octabins and bags
- tilting devices
- sound insulation systems
