In 1982 Herbold invented the wet granulator and has obtained several international patents for size reduction and washing.

Herbold has a large technical laboratory for dry processing and washing where you can test which machine is the most appropriate for your application and the cost effectiveness of your concept.

Herbold Meckesheim has introduced a customer portal, http://myherbold.com where customers can access important information such as operator manuals, spare parts listings, and arrangement/electrical drawings for their specific machines. This portal can also be used to inquiry about pricing and available spare parts.

Herbold Meckesheim is well represented internationally. In the United States we have our subsidiary and have dedicated reps in many other countries around the world. Our Service Department includes technicians for installation, commissioning, training and service, as well as experts on electrical and mechanical troubleshooting.

We can also have a share in financing your investment project. From case to case, rental or hire-purchase for our account will be possible, we can provide assistance in finding a lessor, financing via L/C with deferred payment (term of payment) or supplier credits covered by Euler Hermes.

Our Project Department houses our engineering team who will work closely with you to help plan and develop your application into a fully functional running plant.
